EXPERIENCE

Front End Software Engineer Student

Turing School of Software and Design

This was a 9 month technical training school, where we learned HTML, CSS, and Javascript in an accelerated environment.

Technical Analyst Level 2

Heart Hospital of Austin

Worked as an IT Administrator troubleshooting software and hardware troubleshooting for over 600 devices on the local network.

RF Transmissions Systems (E-4/SrA)

United States Air Force

I was a Senior Airman working on the satellite and radio communications for the Predator and Reaper Unmanned Aerial Vehicles, for 6 years with two deployments to overseas locations.

PROJECTS

Compass Job Search

This was an app built for proof of concept. I wanted to make a site that not only compared jobs but for whatever job you were applying for you could also compare the cities and their quality of life. Built as a group project in 13 days.

Palette Picker

In this project, I built a color palette choosing program, the Front End allows you to Pick different colors, make a palette and save them to a back end, with users, projects and palettes assigned. We built the backend in ExpressJS and KnexJS, with the Front End built in React/Redux. Built as a paired project, over 9 days.
