PROJECTS

BetterFlix

We built BetterFlix to be an IMDB competitor using React, Redux, BrowserRouter, NodeJS, and PostgresSQL. Built using "themoviedb" API, we allowed users to search for by name or browse movies by categories, see detailed information add them to their favorites.
Built as a group project over 7 days.

https://github.com/pgoulding/Netflix-2.0

LightSide

This was an app that utilized React/Router and fetching a Star Wars API to display different cards with Data for Different People, Vehicles, and Planets in the Star Wars Universe.
Built as a paired project, over 7 days.

https://pgoulding.github.io/lightside/

FitLit

This was a Fitness dashboard app, designed to hold a multitude of users information using JSON datasets for their Activity, Sleep, Hydration, and personal info. Utilized jQuery, Mocha/Chai, and Chart.js.
Built as a paired programming project in 10 days.

EXPERIENCE

Front End Software Engineer Student
Turing School of Software and Design

This was a 9 month technical training school, where we learned HTML, CSS, and Javascript in an accelerated environment.

Technical Analyst Level 2
Heart Hospital of Austin

Worked as an IT Administrator troubleshooting software and hardware troubleshooting for over 600 devices on the local network.

RF Transmissions Systems (E-4/SrA)
United States Air Force

I was a Senior Airman working on the satellite and radio communications for the Predator and Reaper Unmanned Aerial Vehicles, for 6 years with two deployments to overseas locations.

SUMMARY

USAF Veteran with over a decade of IT experience and a recent software school graduate.

SKILLS

Development

JavaScript   ES5/ES6+   React   Redux   PostgresSQL   Router   TDD/BDD   jQuery   HTML   CSS/SCSS/SASS   git/github workflow   bash

IT

Windows server 2008 and 2012   Active Directory   Cisco Configuration   Network Troubleshooting   TCP/IP   Apple AirWatch MDM   vi/vim
